EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
MCA(Data Science and Informatics)	National Institute of Technology, Patna	9.10	December 2026
B.Sc.(Honours)in Chemistry	Sree Chaytanya Collage Habra, West Bengal State University	8.23	April 2025
Senior Secondary	West Bengal Council of Higher Secondary Education	85.2	July 2021
Secondary	West Bengal Board of Secondary Education	82.4	May 2019

PROJECTS

• Personal Developer Portfolio

June 2026

Tools: React.js, Vite, CSS, Framer Motion

[]

- Planned and enhanced a modern responsive personal portfolio showcasing projects, technical skills and achievements.
- Enforced smooth UI animations, responsive layouts and deployed on Vercel.

• AI Fraud Detection System (Ongoing)

July 2026 – Present

Tools: Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, Redis, Machine Learning, React

- Developing an AI-powered fraud detection platform using Machine Learning and FastAPI.
- Building scalable backend architecture with PostgreSQL, SQLAlchemy 2.0 and Docker containers.
- Implementing transaction risk scoring, fraud prediction APIs and explainable AI for financial transactions.
- Following production-level software architecture with authentication, logging and model deployment.

• TradeSphere(Ongoing)

July 2026 – Present

Tools: React.js, Node.js, Express.js, MySQL, JWT, REST API, HTML, CSS, JavaScript

[]

- Developed a full-stack business management platform, TradeSphere, for managing core trading and business operations.
- Built a responsive React.js frontend and Node.js/Express.js backend with RESTful API integration and MySQL database management.
- Implemented secure authentication and authorization using JWT, along with structured backend APIs for scalable application development.
- Designed modular frontend and backend architecture with a focus on usability, maintainability and efficient business workflow management.

• Business ERP

May 2026 – July 2026

Tools: React.js, Vite, Node.js, Express.js, MySQL, JWT, REST API, HTML, CSS, JavaScript

[ ]

- Developed a full-stack Business ERP platform for managing purchase, sales, inventory, payments, GST, LC, accounting and business operations.
- Built a responsive React.js frontend with a Node.js/Express.js backend, RESTful APIs and MySQL database integration.
- Implemented secure JWT-based authentication and role-based access control with user-specific data isolation.
- Developed business modules including Purchase, Sales, Stock, LC, Payment, GST, Drawback, Reports, Accounting and Profit Analytics.
- Integrated financial year-wise reporting, PDF export, search and dashboard analytics to improve business monitoring and decision-making.
- Deployed the application with a live production demo using Vercel and maintained the source code on GitHub.

- **ChatBot: Built a rule-based chatbot in C for text-based interaction**

September 2025 – December 2025

Tools: C Language, VS Code

[]

- Improved a rule-based chatbot system for basic human–computer interaction using predefined keywords and responses.
- Executed string handling and conditional logic in C to process user input and generate appropriate replies, achieving efficient text-based communication.
- Created modular functions for input handling, response matching, and conversation flow, ensuring better code readability and maintainability.
- Applied logical analysis and control structures (if–else, loops, string comparison) to analyze user queries and determine suitable responses.

- **Link Collector: Flask app for URL link extraction and export**

September 2025 – November 2025

Tools: Python, Flask, BeautifulSoup (bs4), Requests, HTML, JSON, BytesIO

[]

- Developed a web-based application component to automatically extract and collect all valid hyperlinks from a user-provided URL.
- Integrated web scraping technology using BeautifulSoup and Requests to parse HTML content and retrieve HTTP/HTTPS links efficiently.
- Evaluated the URL processing and link extraction workflow to generate a downloadable text file containing organized link data.
- Collaborated with individual project requirements to design REST endpoints for JSON input handling and file download response.

SKILLS

- **Programming Languages:** Python, Java, C, JavaScript
- **Frontend:** React.js, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, FastAPI, Flask
- **Databases:** MySQL, PostgreSQL, Oracle 10g
- **Data Science:** Pandas, NumPy, Matplotlib, Scikit-learn
- **Machine Learning:** Supervised Learning, Classification, Feature Engineering
- **Developer Tools:** Git, GitHub, VS Code, Docker, Postman
- **Concepts:** REST APIs, JWT Authentication, Data Structures, OOP, DBMS

ACHIEVEMENTS

- [AIR 2817 in NIMCET 2025](#)
